

This comment is in regards to a proposed rule change that can take Air 1 off of FM Translators. As a listener for over 4 years I cannot express to you how much of a positive influence Air 1 has on the community as well as my family. Air 1 is the only positive alternative music station here locally. Now a days I can't turn the radio on to any other station and allow my 10 year old , and 6 year old to listen without influencing them in a negative way. Air 1 plays clean positive music all day long. If Air 1 was off the air waves we wouldn't have anything to listen to on the radio. Many teenagers as well as adults benefit from listening to Air 1. I don't listen to any other station as far as music goes and Air 1 is a big part of my life as well as my kids. I ask that you not take Air 1 off in our local area and I would like the FCC to know that as someone who listens to Air 1 all of the time Air 1 has a positive effect on our local community for youth especially. I believe that keeping Air 1 on the air is something that is of public interest. Thank you very much for allowing a listener to share my comment.
